Projects

Book Store,

https://prakash7277.github.io/bookstore ⌝

Developed a dynamic and modern online bookstore platform leveraging Java, Spring (Spring Boot), Angular, HTML, CSS

User API,

https://prakash7277.github.io/user-register ⌝

I have implemented API integration and CRUD operations in this project, allowing users to add, update, and delete information themselves on the web page.(angular, spring, github, railway cloud)

Gas Booking Management System

Developed a comprehensive Gas Booking Management System using Java, Swing for the graphical user interface, MySQL for database management, and NetBeans as the integrated development environment.
